

# Bilcare signs LoI to provide tech solution to Beltron

**Pune:** Bilcare Technologies, a research and technology business focused on creating next-generation anti-counterfeiting, security and brand protection solutions has signed a letter of intent (LoI) to provide nonClonableID technology to Beltron Telecom, promoted by Bihar State Electronics Development Corporation Ltd.

The collaboration will enable and address the needs of security, and secured e-governance in state and non-governmental projects undertaken by Beltron Telecom for the States of Bihar, Jharkhand and the States of North Eastern region of the country, a Bilcare press release said on Wednesday.

Ramesh Kumar, MD, Beltron Telecom, said in the press release, "Beltron will now be able to offer revolutionary outcomes in the secured e-governance and security space by combining Bilcare Technologies' nonClonableID solution with Beltron Telecom's own execution expertise and strength."

The combined strengths will result in positive impact for initiatives not only in the government sector but also in the private sector wherein Beltron will make possible, the fail-safe securitization of people, products and systems. Praful Naik, executive director of Bilcare said: "The partnership will see Bilcare's technology being used in a wide range of crucial projects under Beltron Telecom's leadership and we are confident that this partnership will help provide the best security solutions to Beltron Telecom's customers and facilitate accomplishment of Beltron Telecom's core objective of providing public utility services of immense value".
